Indulge yourself

The revitalising touch of warm swirling water enriched with millions of bubbles on your body is the ultimate in therapeutic pleasure.

Let Onga hydromassage pumps carry you to another dimension; a place of release, relaxation, indulgence and discovery.

### Full Flo Design, an advantage built in from the start

-  **Ultimate water massage**  
industry leading water pressure will leave you rejuvenated and revitalised.
-  **Energy efficient**  
with more water for less consumed power\*.
-  **Quiet pump operation**  
allows you to relax and be consumed in the soothing, bubbling sound of the spa.
-  **Hygienic**  
with self draining and non-clogging full-flo pump design.
-  **Versatile**  
Suitable for indoor or outdoor mounting without the need of a protective cover.
-  **Approved**  
Onga spa bath pumps comply with Australian/New Zealand Standards.

Available in 3 pump configurations of  
 • Heat Retention • Hot Pump • Electronic Hot Pump  
 with the reliability, quality and Nationwide service support of the leading Onga brand.

**Innovative Products.  
 Inspired People.**

\*pumps without heating element

## Electronic controlled HOT pumps

Luxury and safety features adorn these models.

Luxury finger touch control of water pressure or comfort heat from a dedicated touchpad.

**8** Multiple safety features monitor the water, temperature and electrical conditions to shield against accidental damage.

### Bathmaster®

-  With a gentle touch you are in control of the water massage.
-  Comfort Heat at your fingertips places you in control of the dedicated heating module.
-  Protecting you and your investment, the intelligent Bathmaster senses NO WATER FLOW and quickly turns the pump off.
-  Dry run safety stops the pump if there is no water - preserving the life of your pump.
-  Intelligent electronics protect your pump when the supply voltage is beyond normal limits.
-  Bathe safely knowing that your pump will NOT contribute heat beyond prescribed limits.
-  Fitted with an independent motor overload to minimise electrical motor damage.
-  Reliable operation from the continuous duty motor.

## HOT Pumps

Your HOT pump is simply activated with a fashionable air button.

Integrated "Auto Heat" system maximises the bath water temperature. Ideal for cool nights, dual (air/water) systems, remote pump location or large capacity spa's.

All Onga HOT Pumps have guaranteed controlled heat located in the Full-Flo of water. The corrosion resistant heat boost element is significantly more powerful than competing models.

Your Onga HOT pump incorporates multiple safety features that monitor water pressure, water temperature and motor conditions to shield against accidental damage.

**HOT PUMPS @ 34° C**
